GENERAL INDEX

— A —

ABELES, FREDRICK B. Stimulation of Hill reaction by carbon dioxide, 202

Absorption, distribution, & metabolism of 2,2-dichloropropionic acid in relation to phytotoxicity. I. Penetration & translocation of Cl^{36}- and C^{14}-labeled dalapon, 688

Absorption, distribution, & metabolism of 2,2-dichloropropionic acid in relation to phytotoxicity. II. Distribution & metabolic fate of dalapon in plants, 698

Absorption of phosphorus applied to leaves of sunflower, effect of soil moisture stress on, 762

Absorption, rubidium, kinetics of, by barley, 183

Accumulation & transformation of sugars in stalks of sugar cane. Origin of glucose & fructose in the inner space, 175

Acetate, labeled, 2,4-dichlorophenoxyacetic acid effect on utilization of, by bean leaf & stem tissues, 192

Action spectra of light-saturated photosynthesis, 114

ADAMS, DONALD F. Variations in starch & total polysaccharide content of *Pinus ponderosa* needles with fluoride fumigation, 261

Adenylate kinase involvement in phosphorylation of ribose-5-phosphate by adenosinediphosphate in mitochondria-free preparations from rough lemon leaves, 368

Agrobacterium bacterium, DNA content of broad bean internodes in connection with tumor induction by, 216

AKAZAWA, T. Analytical study of ipomeamarone & chlorogenic acid alterations in sweet potato roots infected by *Ceratocystis fimbriata*, 139

ALBERT, LUKE S. Effect of boron on elongation of tomato root tips, 244

Algae, mass culture of, 342

ALSTON, RALPH E. See ARNOLD, ALLAN, 650

Alyssum saxatile, salt tolerance & protoplasmic salt hardiness of, 478

AIBS Style manual, 715

American Society of Plant Physiologists, business meeting, 1960, 124

American Society of Plant Physiologists, business meeting, 1961, 850

American Society of Plant Physiologists, executive committee meeting, 1960, 121

American Society of Plant Physiologists, executive committee meeting, 1961, 847

American Society of Plant Physiologists, midwestern section, 715

American Society of Plant Physiologists, northeastern section, 520

American Society of Plant Physiologists, southern section, 359

Amino acid treatment, production of yellow strapleaf of chrysanthemum & similar disorders by, 197

Ammonia assimilation by nitrogen-starved cells of *Chlorella vulgaris*, 208

Anabaena cylindrica, pteridines in, 240

Anabaena variabilis, pteridines in, 240

Anacystis nidulans, pteridines in, 240

Analytical study of ipomeamarone & chlorogenic acid alterations in sweet potato roots infected by *Ceratocystis fimbriata*, 139

ANDREAE, W. A. Studies on 3-indoleacetic acid metabolism. VII. Metabolism of radioactive 3-indoleacetic acid by pea roots, 783

Anthocyanin production in detached petals of *Impatiens balsamina* L., 1

Antirrhinum majus, salt tolerance & protoplasmic salt hardiness of, 478

ARNOLD, ALLAN. Certain properties of hypocotyl of *Impatiens balsamina* reflecting physiological complexity, 650

Ascorbic acid, photooxidation of, 252

ASOMANING, EDWIN J. A. Comparative study of phototropic response & pigment content in oat & barley coleoptiles, 453

Aspergillus niger, isolation & characterization of malformin, 30

Aspergillus niger, studies on response of bean seedlings & corn roots to malformin, 37

Assimilation of ammonia by nitrogen-starved cells of *Chlorella vulgaris*, 208

Assimilation of C^{14}, N^{15} labeled urea by excised apple & peach leaves, 757

Auxin-boron relationship in C^{14} translocation in bean plants, 672

Auxin concentrations, high, steady state growth of Avena coleoptile sections in, 323

Auxin formation from tryptophan through action of polyphenols, 838

Auxin, mediation of geotropic response by lateral transport of, 364

Auxin-phenol complexes, 589

Avena sativa, comparative study of phototropic response & pigment content in coleoptiles, 453
Avena sativa, growth & geotropic curvature of coleoptiles in presence of *n*-1-naphthylphthalamic acid, 727
Avena sativa, steady state growth of coleoptile sections in high auxin concentrations, 323
AWARD, CHAS. REID BARNES, 850
AXELROD, BERNARD. See EVANS, WILLIAM R., 9

Calcium effects on oxalic, malic, & citric acid content of Valencia orange leaf tissue, 99
Calcium, essential role of in selective cation transport by plant cells, 437
Calcium in excised barley roots, uptake of magnesium & its interaction with, 290
Calcium influence on selectivity of ion absorption process, 58
Calcium, transpiration stream & ascension of, 429
Calcium uptake by excised barley roots, 53
Calcium uptake in roots of *Zea mays*, 766
Callus growth in bean stem sections, 89
Carbohydrate translocation in raspberry & soybean, 820
Carbohydrate, cell wall, in tobacco pith parenchyma as affected by boron deficiency & by growth in tissue culture, 336
Carbon dioxide fixation by auxin treated tissue, 374
CO_2 Fixation, in vitro, in sweet orange leaves, cyanide & chelating agent effects on, 118
Carbon dioxide, stimulation of Hill reaction by, 202
CARLTON, BRUCE C. Effects of ethylene & oxygen on production of a bitter compound by carrot roots, 550

CARRIER, WM. L. See HABER, ALAN H., 351
CASTLE, JOHN E. See MUMFORD, FRANKLIN E., 752
CATHEY, H. M. See TOOLE, VIVIAN K., 663
Cation effect on germination & germ tube development of *Puccinia coronata* uredospores, 14
Cation effect upon absorption of carrier-free cesium, 66
Cation transport, selective, by plant cells, essential role of calcium in, 437
Cell wall carbohydrates in tobacco pith parenchyma as affected by boron deficiency & by growth in tissue culture, 336
Cell wall preparations from corn coleoptiles, enzymatic activities associated with, 605
Celosia argentea, salt tolerance & protoplasmic salt hardiness of, 478
Ceratocystis fimbriata, changes in nitrogen metabolism in sweet potato with, 770
Certain properties of hypocotyl of *Impatiens balsamina* reflecting physiological complexity, 650
Cesium absorption, effect of cations upon, 66
Changes in nitrogen metabolism in sweet potato with black rot, 770
Changing respiratory pathways in potato tuber slices, 20
Chenopodium album, foliar penetration by chemicals, 169
Chenopodium amaranticolor, translocated heat injury, 721
CHERRY, JOE H. Effects of X irradiation on corn seed, 566
CHERRY, JOE H. Nucleotide & ribonucleic acid metabolism of corn seedlings, 163
Chlorella ellipsoidea, mass culture of algae, 342
Chlorella pyrenoidosa, action spectra of light-saturated photosynthesis, 114
Chlorella pyrenoidosa, reductive pentose phosphate cycle, 409
Chlorella pyrenoidosa, time course of oxygen evolution during photosynthesis in synchronized cultures of, 232
Chlorella pyrenoidosa, valine biosynthesis, 598
Chlorella vulgaris, assimilation of ammonia by nitrogen-starved cells of, 208
Chlorella vulgaris, mass adaptation to selenomethionine in populations of, 502
Chlorella vulgaris, mechanism of stimulation of respiration by purines, 317
Chlorella vulgaris, stability & reversibility of adaptation to selenomethionine in, 509
Chlorine uptake in roots of *Zea mays*, 766
Chlorogenic acid alterations in sweet potato roots infected by *Ceratocystis fimbriata*, 139
Chlorophyll synthesis & red, far-red response, 733
Chloroplast preparations, light dependent oxygen metabolism of, 252
Chloroplasts distinguished by use of labeled oxygen, cyclic & non-cyclic photophosphorylation in, 44
Chlorosis, fluoride induced, mechanism(s) of, 385
Chlorosis in higher plants as related to organic acid content, 415
CHMIELIR, I. C. See BENSON, N. R., 296
Chrysanthemum morifolium, production of yellow strapleaf & similar disorders by amino acid treatment, 197
Citric acid content of Valencia orange leaf tissue, effects of calcium, potassium, & magnesium on, 99
Citrullus vulgaris, assimilation of C^{14}, N^{15} labeled urea by excised leaves, 757
Citrus aurantium, effect of soil oxygen deficit on iron nutrition of seedlings, 425
Citrus jambhiri, involvement of adenylate kinase in phosphorylation of ribose-5-phosphate by adenosinediphosphate in mitochondria-free preparations from rough leaves, 368
Citrus limon, photosynthesis & respiration in developing fruits, 69
Citrus sinensis, cyanide & chelating agent effects on in vitro CO_2 fixation in leaves, 118
Citrus sinensis, effect of sodium bicarbonate on iron absorption by, in seedlings, 52
Citrus sinensis, photosynthesis & respiration in developing fruits, 69
CLAUSS, HEINZ. See NELSON, C. D., 581
Cobalt influence on nitrogen fixation by Medicago, 73
Coconut milk, hexitols in: their role in nurture of dividing cells, 492
Cocos nucifera, hexitols in, their role in nurture of dividing cells, 492
COLLINS, FLOYD I. See CHERRY, JOE H., 566
Comparative study of phototropic response & pigment content in oat & barley coleoptiles, 453
CONRAD, HERBERT M. Interaction of gibberellic acid & allyl trimethylammonium bromide upon growth of Ulothrix, 685
Conversion of nicotine to nornicotine in harvested tobacco: Fate of methyl group, 592
Corn kernels, isolation of indole-3-acetic acid from, 354
Correlation between inactivation of 2,4-dichlorophenoxyacetic acid & cessation of callus growth in bean stem sections, 89
CORY, R. See BIDDULPH, O., 429
COVEY, H. MELVIN. Effect of cations on germination & germ tube development of *Puccina coronata* uredospores, 14
Critical phosphorus levels for lima bean growth, 626
CROSBY, DONALD G. Naturally occurring growth substances. II. Improved straight growth test & its applications, 48
Crown-gall tissue cultures of tomato, oxidation of reduced diphosphopyridine nucleotide by mitochondria from, 347
Cucumus sativus, photosynthesis & respiration in developing fruits, 69
Cucumis sativus, translocated heat injury, 721
CURRIER, H. B. See DYBING, C. DEAN, 169
CURTIS, ROY W. See TAKAHASHI, NOBUTAKA, 30
